## Projects

<b>Payments App</b> <a href="https://github.com/RevanthMali/payTM-Project">https://github.com/RevanthMali/payTM-Project</a> This project is a basic replica of a payment service like Paytm. It allows users to perform various actions such as signing in, signing up, checking their balance, and sending money to other users. Showcase fundamental features of a payments app with <b>intuitive design</b> and <b>streamlined functionality</b> . Utilized scalable <b>NodeJS</b> and flexible <b>MongoDB</b> backend for future user expansion.	2024-2024
<b>Music Library Management system</b> <a href="https://github.com/RevanthMali/MusicLibraryManagementSystem">https://github.com/RevanthMali/MusicLibraryManagementSystem</a> The goal of this project is to develop a <b>Music Library Management System</b> , aiming to streamline the organization of recorded music collections encompassing tracks, artists, albums, and playlists. Leveraging Java as my primary language, I adhered to Object Oriented Programming principles and adopted iterative development methodologies. My responsibilities entailed implementing pivotal features such as artist, track, album, and library management classes. Furthermore, I played a key role in crafting comprehensive documentation, design decisions, and usage guidelines.	2024-2024

<b>Portfolio</b> <a href="https://revanthmali.github.io/portfolio/">https://revanthmali.github.io/portfolio/</a> -Crafted a <b>Clean and modern portfolio</b> showcasing my skills and projects, built with HTML/CSS for sleek design. -Immediate <b>navigation, responsive layout</b> for seamless viewing on various devices, and a concise presentation of my resume highlights.	2024-2024
